

Aroma Therapy

Dear Customer,

We are very pleased that you decided to choose an aroma lamp from our pottery.

Instructions for use:

Fill the bowl with water and add 1-6 drops of our natural ethereal oils. Light the tea light under the bowl.

The water will heat up and evaporate dispersing the oil essence and spreading a delightful fragrance throughout the room.

You will breathe in the oils in very small doses, similar to an inhaler. This will increase your well-being.

The distance from the flame to the bowl ensures a water temperature of 30-50° C. This corresponds to evaporation in nature.

One refill will do for one tea light! If you forget to refill the bowl at any time, the lime scale can be removed easily with some vinegar.

The base of the lamp is designed with an elevation, to prevent it getting too hot and marking your table. It is quite safe to use the lamps during the night.

We send our ethereal oils and our aroma lamp by post. Should the bowl get broken, send us a broken piece and you can have the bowl replaced. Please have a look at our price list.
